**CRYBABY****HUNTER EQUIPMENT**

(Small Mechanical Model)

**SPECIAL ABILITIES**

**Cry Baby:** The model activates an inflatable Decoy with BP 3 and AGL 10 that has a BP Range of 10". All unengaged Zed Grubz and Zed Bugz within it's BP Range will be attracted to it and ignore any Hunterz Move or Charge Action as this Noisy device has their attention until the Decoy is removed from play.

To deploy a Cry baby, a model may spend one Action to toss the Decoy model up to 10". Roll a D10, if the number rolled is equal or higher than the number of inches between the Hunter and the Decoy model, the Decoy lands at the intended target location. Otherwise the model will Stray the number of inches in the direction the top of the die face is pointing.
